Abstract of JP 63307857 (A)

NEW MATERIAL: The compound of formula I [R is cyanoalkyl; A is bivalent group of (substituted) 2-4C saturated or unsaturated hydrocarbon; the bond between A and B is univalent, bivalent, etc.; X is NH, N, O, S, CH, etc.; Y is cyano, nitro, etc.).

EXAMPLE 3-12: Cyanomethyl-2-cyanoimidazolehydro-1,3-thiazine. USE: An insecticide free from phytotoxicity to cultivated plants and applicable against harmful insects (e.g. azuki bean weevil, grain weevil, gypsy moth or green rice leafhopper). **PREPARATION:** The compound of formula 3 can be produced by reacting a compound of formula 11 with a compound of formula R-Hal (Hal is halogen).
